

Report about the Audio Drama Project of Class 7/4 *(Hörspielprojekt)*

At school we have written a script (*Drehbuch*) for 3 weeks long because we wanted to make an audio drama. First we brainstormed the plot of the story and the characters in our audio drama and then we wrote the script. On 31st January 2018 we finally made a trip to a recording studio named SAEK with the (English) teachers Ms. Pittner and Ms. Wieland. It was impressive because that looked really interesting and it was very funny. Long story short sense... Let's come back.

At first, we went up in the fourth floor without using the elevator and we were finally there. The first thing we did was file our stuff and then we were in the seminar room. It was really close but this room looked really good because the walls were colorful. Then the team showed us the other rooms, like the recording studio or the IT room where you can cut the audio drama. They looked really good, too. Then we went back to the seminar room. There we heard an audio drama to know how an audio drama sounds and then the SAEK team was introduced to us and of course we had to introduce ourselves.

Secondly, we went to our room which was assigned to us and we recorded our audio drama with our supervisor of the SAEK team. That was fun! Some groups were already ready with the recording. Then it was lunchtime. We went to a pizzeria but some students went to an Asia restaurant or to a kebab shop. The food was really delicious. The lunchtime was over so we went back to the recording studio. Now we had to search for sound effects and music. The other team members had to cut out the mistakes and when we were ready with the cutting we had to add the sound effects and music. When we were ready with that we had to tidy the room and after that we could relax.

At last, we went back in the seminar room when all groups were ready and heard last words from our supervisors. After that we could finally go home now after 8 hours but it was anyway a very beautiful day.
